

1

Prepaid Electricity

Prepaid Electricity is a value added service that allows clients to conveniently buy electricity tokens directly through the platform, without needing to use separate apps or physical outlets.

It saves clients time and effort by giving them a fast, easy, and reliable way to purchase electricity whenever they need it.

The client can quickly buy electricity by selecting the Buy Electricity entry point, capturing their meter token delivery preference and paying in just a few steps. The process is smooth and easy to follow, with clear prompts guiding the client from start to finish.

This enables them to receive their electricity token instantly, without needing to visit a store or switch between different apps.

2

Important to note:

- The client must have a registered and active account on the platform.
- The client must have either the Owner | Manager role loaded to buy electricity
- The client's meter number must be valid and correctly added to your profile.

3.1

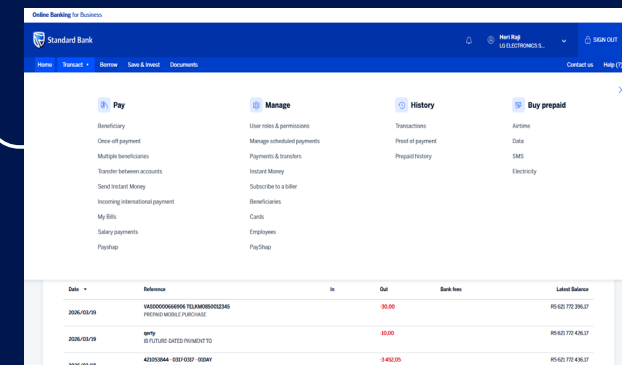

Key Steps for the client to follow:

Step 1:

On the Home screen, navigate to the top menu and select "Transact" on the menu.

This path is:

Home Landing screen → Select "Transact" menu item

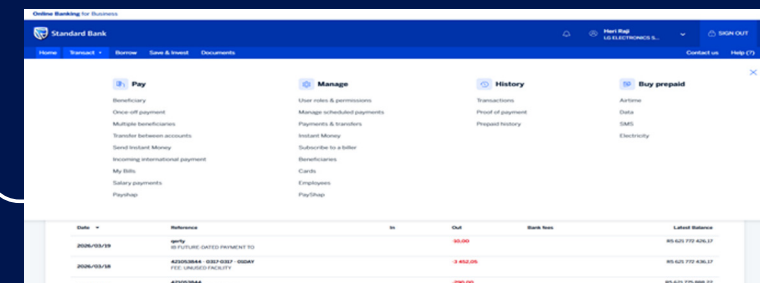

3.2

Step 2:

Select Electricity voucher type

On the Buy prepaid section → Select Electricity

3.3

Step 3:

Select the From account and then capture the Meter number, amount and delivery method.

4

Helpful Tip:

To save time, you can repeat previous purchases from Prepaid History instead of recapturing beneficiary details. You can also print, download, or send proof of payment by SMS or email.

5

Important to note:

- Limits R5000 per day
- R30 000 monthly
